Automation Tester with 1.5 years of hands-on experience in testing both UI and APIs. A strong team player who takes full responsibility for tasks and is committed to delivering high-quality automated testing solutions. Skilled in building test frameworks to quickly identify and fix issues, enhance system performance, and ensure superior product quality.

EXPERIENCE

QUALITY ASSURANCE (QA) ENGINEER
Cognizant (Client: **Humana Inc.**)
September 2024 – Present

- Automated 110+ test cases across UI (Selenium) and API (REST API), reducing regression testing time by 40%.
- Developed and maintained automation scripts in C# with NUnit, improving framework stability and code reusability.
- Performed functional, regression, integration testing within Agile sprint cycles to ensure product reliability.
- Partnered with cross-functional teams to identify and resolve issues early, cutting defect leakage by 15%.
- Leveraged QTest for test management and Git for version control; utilized VS Code for debugging and automation development.
